

IAN CHAYA

Nice, France | +33 7 67 05 36 15 | ianchaya.pr@gmail.com
Argentinean/Croatian | Portfolio: <https://ianchaya.github.io/portfolio-ianchaya/>

PROFESSIONAL SUMMARY

Electronic Engineer with Diploma in Industries 4.0, bringing 4+ years of experience in Industrial Automation, including expertise in Robotics, Embedded Systems Programming, Electronic Circuit Design, Signal Processing, and Web Development. Currently at Schneider Electric, specializing in Software Validation, Bug Analysis, PLC/SCADA Programming, and IEC61499 Standards Implementation. Proven success developing Automation Solutions, executing comprehensive Test Scenarios, implementing Quality Process Improvements, and leveraging AI Tools to optimize Testing Efficiency and automate DevOps Workflows. International experience across France, Austria, and Argentina with trilingual proficiency.

PROFESSIONAL EXPERIENCE

Automation Engineer | Schneider Electric | Carros, France

March 2023 – Present

- Perform comprehensive software validation for industrial automation platforms, configuring complex test environments with PLCs, sensors, networks, and HMI systems leading to +500 bugs created,
- Conduct bug analysis and root cause investigation, creating detailed technical documentation for development teams to resolve critical issues
- Execute System/Agile testing methodologies including test case creation, user story writing, and participation in sprint planning
- Lead quality process improvements through presentations and cross-functional collaboration with international teams
- Develop AI-powered tools to optimize testing workflows, including bug report generator and automated User Story Analyser and Test Case Generator integrated with DevOps using Ollama, Claude AI.
- Validate compliance with IEC61499 standards and industrial communication protocols (Modbus, OPC-UA, MQTT, EtherNet/IP, Profinet)
- Completed 3-month in Vienna, Austria, mastering EcoStruxure Automation Expert software foundations and advanced system verification techniques

Automation and Robotics Engineer | BGH | Río Grande, Argentina

July 2021 – February 2023

- Led industrial automation projects from analysis through deployment, managing complete project lifecycle
- Designed and programmed collaborative robot (cobot) systems for manufacturing assembly lines
- Developed custom electronic circuits, embedded systems, and microcontroller solutions for production equipment
- Created 3D models and prototypes for automation components using Fusion 360 and 3D printing
- Managed project documentation, requirements analysis, and stakeholder communication

Automation Engineer | eProc SRL | Rosario, Argentina

April 2021 – June 2021

- Developed industrial automation solutions using Siemens PLC, HMI, and SCADA programming
- Implemented SCADA systems for real-time monitoring and control of industrial processes
- Worked in agile/Scrum framework delivering automation projects with cross-functional teams

R&D Engineer - Radar Signal Processing | ZF Autocruise | Brest, France

March 2020 – September 2020 (Engineering Internship)

- Developed MATLAB application for analyzing automotive radar signal processing chains for autonomous driving systems
- Performed data acquisition using mmWave radar development boards and implemented signal processing algorithms
- Created custom GUI using MATLAB App Designer for R&D team workflow optimization

TECHNICAL SKILLS

Industrial Automation: IEC61499, Modbus, OPC-UA, MQTT, EtherNet/IP, Profinet, SCADA Systems, PLC Programming

PLC & HMI: Siemens Step7, TIA Portal, WinCC, Ladder Logic, Function Block Diagrams, EcoStruxure Automation Expert

Programming: C/C++, Python, JavaScript, React JS, HTML/CSS, Ladder Logic, Node-RED, IEC61499 Applications

AI & Automation Tools: Ollama, Claude AI, Gemini, ChatGPT, AI-powered bug analysis, automated test case generation

Robotics: Universal Robots (Polyscope), Collaborative Robot Programming

Embedded Systems: STM32, Arduino, Raspberry Pi, Microcontroller Programming, STM32CubeIDE, RTOS

CAD & Design: Fusion 360, AutoCAD, Eagle PCB Design, 3D Modeling, Prusa Slicer

Development Tools: Visual Studio Code, MATLAB, Git/GitHub, DevOps, Agile/Scrum, Quality Assurance

Protocols: RS232/RS485, I2C, SPI, CAN Bus, Industrial Ethernet, TCP/IP

Web Development: React JS, Bootstrap, SASS, Firebase, REST APIs, SPA Development, SEO

EDUCATION

Electronic Engineer | Universidad Nacional de Rosario (FCEIA), Argentina | 2013 – 2021

Specialization: Power Electronics, Industrial Automation, Embedded Systems, Signal Processing, IoT, Telecommunications

International Exchange - Electronic Engineering | École Nationale d'Ingénieurs de Brest (ENIB), France | 2019 – 2020

Diploma in Industries 4.0 | Universidad Tecnológica Nacional, Argentina | 2022

Focus: Data Analytics, Cloud Computing, Cybersecurity, Robotics, Lean Management, Digital Transformation

Front-End Development Certificate | CoderHouse | 2022

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Advanced Training – Collaborative Robots (Cobots) Programming | Universal Robots
- Scrum Master Certification | Universidad Tecnológica Nacional
- Installations and Electro-Pneumatic Controls | Universidad Nacional de Tierra del Fuego
- Training Course in Ergonomics | IAS
- Management Technologies for Productive Improvement | INTI

LANGUAGES

Spanish: Native | **English:** Professional Fluency (TOEIC: 960/990) | **French:** Professional Working Proficiency (DELF B2: 87/100)

CORE COMPETENCIES

Project Lifecycle Management • Agile/Scrum Methodologies • Automation Solution Development • PLC/SCADA Programming • Quality Process Improvement • Technical Documentation • Bug Analysis & Root Cause Investigation • Cross-Functional Team Collaboration • Problem-Solving & Active Listening • Presentation & Communication Skills • User Story Writing • Requirements Analysis • Circuit Design & Prototyping • System Verification Testing • AI-Driven Process Optimization • Continuous Improvement Mindset • Proactive & Creative Approach • Stakeholder Communication • International Team Experience • Team Leadership
